Financial Econometrics
FALL 2021

Instructor: Ji Hyung Lee, DKH 25, E-mail: jihyung at illinois.edu.

Graders: Hongqi Chen, email: hongqic2 at illinois.edu, Zhendong Sun: zs6@illinois.edu

Mode of Delivery, Time and Location

- The regular lectures will be asynchronous, hence pre-recorded and uploaded via Compass. You are supposed to listen to the lectures BEFORE coming to the discussion section.

- We will have discussion section in class at Armory 432.

Office Hours: You can use the discussion section to ask any question, and there will be occasional online office hours. You can request an individual office hour by appointment (at least 2-day advanced notice is required).

Main Course Materials: Course Slides and Lecture Notes, prepared by the instructor

Recommended Textbooks

- An Introduction to Computational Finance and Financial Econometrics by Eric Zivot, manuscript in preparation. Pdf files will be provided through course webpage.

- Financial Econometrics by Oliver Linton, Cambridge University Press

Exams: Exams are open-book take-home exams. Exam 1 is during 10/1-10/8 and Exam 2 is during 12/8-12/15. Please see the course schedule in page 3-4 below.

Assignments

There will be 7 problem sets, typically with 5-7 days to finish.

Please use our course webpage for your questions. In this way we can openly discuss what are difficult and how to overcome. You can discuss problem sets with classmates, but must submit your own answers. Problems sets are mainly to encourage you to "practice", and understanding them by yourself will be the most important task in this class. The written solutions will not be provided; you are supposed to review the course materials and find the
answers by yourselves. Memorizing solutions right before the exam is not the right way to
learn. If you want to clarify your mistakes in your homeworks after being graded, please talk
to the instructor or grader by setting up an appointment.

**Grading:** There will be 7 assignments and two take-home exams. They will count toward
the grade as follows. If you miss any of the exams or most parts of assignments, you cannot
pass this course.

<table>
<thead>
<tr>
<th>Component</th>
<th>Weightage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments</td>
<td>50%</td>
</tr>
<tr>
<td>Exam I and II</td>
<td>50%</td>
</tr>
</tbody>
</table>

The final grading scale is in principle given as follows:

- **A+** \([97, 100]\),  **A** \([93, 97]\),  **A−** \([90, 93]\),
- **B+** \([87, 90]\),  **B** \([83, 87]\),  **B−** \([80, 83]\),
- **C+** \([77, 80]\),  **C** \([73, 77]\),  **C−** \([70, 73]\),
- **D+** \([67, 70]\),  **D** \([63, 67]\),  **D−** \([60, 63]\),
- **F** : \([0, 60]\).

The deadline policy for assignments is strict. If you do not submit in time, you will get zero
credit for that assignment. Please submit what you have by the deadline, so that you can
get the partial credit even though you cannot finish in time. If you believe you have a valid
reason for the late submission of assignment or some other factors I need to consider, please
contact the office of the dean of students (https://odos.illinois.edu/) and get the supporting
document. Otherwise, all the policy laid out here will be strictly followed.

**Academic Integrity**
Regarding the violation of academic integrity, the student code for ACADEMIC INTEGRITY
POLICY AND PROCEDURE from the University of Illinois system will be strictly followed:
http://studentcode.illinois.edu/article1/part4/1-402/

**Description of the Course**
This course is an introduction to econometric modelling in empirical/computational finance.
The main focus is to study econometric models and methods to understand financial market
dynamics. We first begin by reviewing the essential concepts in probability/statistics and
time series econometrics. Then some popular financial econometric models and estimation
methods will be investigated. Finally, we review selected topics in finance, and learn how
to apply the econometric methods to analyze and understand the empirical properties of
financial market data. Both analytical problem sets and data exercises will be assigned as
homework, in order to enhance our theoretical understandings and practical skills.

**Course Schedule - subject to some changes**
• Week 1: Course Introduction, Understanding Empirical Properties of Time Series Data

• Week 2: Review of Concepts in Probability Theory

• Week 3: Non-instructional day (9/6; no class, Labor Day), Review of Concepts in Probability and Statistics

• Week 4: Review of Concepts in Probability and Statistics

• Week 5: Introduction to Time Series Econometrics

• Week 6: Time Series Econometrics

• Week 7: Exam I (open-book & take-home; 10/1-10/8)

• Week 8: Time Series Econometrics

• Week 9: Time Series Econometrics

• Week 10: Volatility Models

• Week 11: Volatility Models

• Week 12: Single Index (SI) Model & Estimation

• Week 13: Single Index (SI) Model & Estimation

• Week 14: Thanksgiving Break (no class)

• Week 15: Multi-factor Asset Pricing

• Week 16: Exam II starts from 12/8

• Week 17: Exam II (open-book & take-home; 12/8-12/15, 10pm)
Safety Information

Run > Hide > Fight
Emergencies can happen anywhere and at any time. It is important that we take a minute to prepare for a situation in which our safety or even our lives could depend on our ability to react quickly. When we’re faced with any kind of emergency – like fire, severe weather or if someone is trying to hurt you – we have three options: Run, hide or fight.

Run
Leaving the area quickly is the best option if it is safe to do so.
- Take time now to learn the different ways to leave your building.
- Leave personal items behind.
- Assist those who need help, but consider whether doing so puts you at risk.
- Alert authorities of the emergency when it is safe to do so.

Hide
When you can’t or don’t want to run, take shelter indoors.
- Take time now to learn different ways to seek shelter in your building.
- If severe weather is imminent, go to the nearest indoor storm refuge area.
- If someone is trying to hurt you and you can’t evacuate, get to a place where you can’t be seen, lock or barricade your area, silence your phone, don’t make any noise and don’t come out until you receive an Illini-Alert indicating it is safe to do so.

Fight
As a last resort, you may need to fight to increase your chances of survival.
- Think about what kind of common items are in your area which you can use to defend yourself.
- Team up with others to fight if the situation allows.
- Mentally prepare yourself – you may be in a fight for your life.

Please be aware of persons with disabilities who may need additional assistance in emergency situations.

Other resources
- police.illinois.edu/safe for more information on how to prepare for emergencies, including how to run, hide or fight and building floor plans that can show you safe areas.
- emergency.illinois.edu to sign up for Illini-Alert text messages.
- Follow the University of Illinois Police Department on Twitter and Facebook to get regular updates about campus safety.
