**ECON 402: American Economic History**
Survey of the history of the American Economy from the colonial era to the present. Studies the features and development of the American economy and examines the watershed events that have transformed it over its history. **Prerequisites:** ECON 202; ECON 302; MATH 220/221 or other Calculus courses are required. CRN 70477; Sect. A3; TR 11:00AM-12:20PM; 321 Greg Hall
Professor I. DiIanni

**ECON 415: Environmental Economics**
Application of economic theory to topical issues such as pollution, climate change, and the environmental impacts of overpopulation. Both market-based and regulatory solutions to these problems are discussed. **Prerequisites:** ECON 202; ECON 302; MATH 220/221 or other Calculus course. CRN 70758; Sect. A3; TR 11:00AM-12:20PM; 319 Greg Hall
Professor R. Akresh

**ECON 422: International Macroeconomics**
International macroeconomics and financial crises. Topics include balance of payments, exchange rates, business cycle risk, currency unions, and safe assets. Emphasis on understanding different types of financial crises from a positive and normative perspective. **Prerequisites:** ECON 202 or introductory statistics equivalent, ECON 303, MATH 220/221 or Calculus I equivalent. CRN 77282; Sect. A3; TR 9:30AM-10:50AM; 1090 Lincoln Hall
Professor G. Howard

**ECON 425: Macroeconomic Policy**
Analyzes current macroeconomic policy issues, problems, and techniques; discusses various policy techniques including monetary, fiscal, income, and exchange rate policies, and their effectiveness for treating inflation, unemployment, productivity, resource, and exchange rate problems. May emphasize current issues in developed economies or in emerging market economies. Credit is not given for ECON 462 and ECON 425. **Prerequisites:** ECON 203; ECON 302; MATH 220 or MATH 221 are required. MATH 231 is recommended. Prior exposure to financial markets is encouraged. CRN 70552; Sect. A3; TR 9:30AM-10:50AM; 215 DKH
Grad Student H. Martinez Garcia

**ECON 426: Monetary Economics & Policy**
Study of a variety of topics on money, banking, and financial markets. In particular, provides an introduction to money and its role in the economy, the bond market and interest rates, the stock market and other financial assets, exchange rates, banks and regulation of the banking industry, the money supply process and monetary policy. **Prerequisites:** ECON 202; ECON 303; MATH 231 are required. MATH 232 is recommended; Prior exposure to financial markets is also encouraged. CRN 70775; Sect. A3; TR 12:30pm-1:50pm; Pending
Instructor Pending

**ECON 437: Game Theory**
Explores games theory and strategic decision-making. Game theory is the study of strategic interaction where one person’s actions affect the actions of others. Introduces students to the tools for modeling and solving problems with strategic interaction. Will cover topics such as Nash equilibrium, dominance, voting, bargaining, auction, and adverse selection, each of which has broad applications in economics, politics, psychology & everyday life. **Prerequisites:** ECON 202; ECON 302; MATH 220/221. ECON 203; MATH 231 are recommended. CRN 70772; Sect. A3; MW 11:00AM-12:20PM; Pending
Professor S. Krassa

**ECON 442: Women in the Economy - Adv. Comp**
Applies economic models of the labor market and household organization to a wide range of important topics, including marriage, fertility, discrimination, and family dynamics to better understand both personal life choices and public policy problems. **Prerequisites:** ECON 203; ECON 302; MATH 220 or 221 or other Calculus I equivalent; completion of campus Composition I general education requirement. CRN 70549; Sect. A3; MW 9:30AM-10:50AM; 209 DKH
Professor E. Powers

**ECON 447: Economics of the Workplace**
Application of economic theory to the relationship between workers and firms in the workplace. We will apply important economic concepts and models to issues including recruitment, personnel selection, employee training, managing turnover, job design, performance evaluation, and incentive compensation. **Prerequisites:** ECON 202; ECON 302; MATH 220/221 or other Calculus courses. CRN 70768; Sect. A3; TR 9:30AM-10:50AM; 123 DKH
Professor Y. Sun

**ECON 448: Employee Compensation & Incentive**
Employee compensation is a critical tool for organizations to attract, retain, and motivate their employees. Students will be introduced to major principles in compensation design and examine the incentives embedded in various compensation systems. The topics include forms of pay, incentive theory, pay structure, pay for performance, and employee benefits. **Prerequisites:** ECON 202; ECON 302; MATH 220/221 or other Calculus courses. CRN 70770; Sect. A3; TR 12:30PM-1:50PM; 1092 Lincoln Hall
Professor Y. Sun

**ECON 450: Development Economics**
Analyzes the economic problems associated with newly developing nations, emphasizes the economic structures, their factor scarcities, and their programs for development. Not open for graduate credit to graduate candidates in economics. **Prerequisites:** ECON 102 and ECON 103 or equivalent. ECON 302 is strongly recommended. CRN 61807; Sect. A3; TR 11:00AM-12:20PM; 123 DKH
Professor R. Akresh

**ECON 456: Economic Development & Migration**
Topics include the inter-relationships between economic development and migration. After introducing the basic concepts of poverty and inequality - between as well as within countries - this course focuses on the role that migration and population growth play in the process of economic development. The causes of migration and its consequences are examined at national and international levels together with their policy implications, including those related to urbanization, brain drain, and labor market impacts of immigration. A range of migration forms is discussed, including international and internal migration, permanent and temporary migration, legal and illegal migration, as well as forced migration and refugees. **Prerequisites:** ECON 202; 302; MATH 220/221 or other Calculus course. CRN 77550; Sect. A3; MW 11:00AM-12:20PM; 215B DKH
CRN 77554; Sect. B3; MW 12:30PM-1:50PM; 215B DKH
Professor M. Kleemans

**ECON 460: Financial Economics**
Introduces basic financial products (stocks, bonds, futures, options, and other derivatives), asset pricing theory including capital asset pricing model (CAPM), arbitrage pricing theory (APT), financial institutions and the organization of financial markets, and some topics on financial crisis and monetary policy. **Prerequisites:** ECON 202; ECON 302; MATH 220/221 or other Calculus course. CRN 70812; Sect. A3; MW 9:30AM-10:50AM; Pending
Grad Student M. Cho

**ECON 471: Intro to Applied Econometrics**
Introduction to specification, estimation, prediction and evaluation of econometric models, emphasizing the interplay between statistical theory and economic applications. **Prerequisites:** ECON 203 or equivalent; ECON 302 or ECON 303. CRN 50082; Sect. A3; MW 3:30PM-4:50PM; 114 DKH
Professor J. Shea

**ECON 483: Econ of Innovation & Tech**
Examines the economic factors shaping innovation and technical change since the industrial revolution with emphasis on the economic relationship between science and technology and the role of government in technical change. **Prerequisites:** ECON 102 or equivalent; ECON 302 or consent of instructor. CRN 45915; Sect. A3; MW 11:00AM-12:20PM; 123 DKH
Professor J. Lemus

ECON 484: Law and Economics
How much should a pianist pay for their hand insurance? Or a mining company for damage to an ecosystem? The course explores this type of question through the most common methods for the valuation of non-market goods and services. These are used often by government agencies, attorneys, and judges to calculate damage to the environment or health, insurance companies, and all branches of economics which need to assign values to goods and services that are not traded in markets. Topics include stated preferences, travel cost methods, and the hedonic method, among others. By the end of the course, the student will be familiar with the most common evaluation methods and will be able to apply them to formulate original housing-related research questions and write a coherent research paper.

Prerequisites: ECON 302 or ECON 303; MATH 220 or MATH 221 or other Calculus courses.
CRN 58695; Sect. C3; TR 2:00pm-3:20PM; 317 DKH
Grad Student M. Yi

ECON 490: Gender & Development
Focuses on the role of gender economics in developing countries. A variety of topics in the intersection of gender economics and development economics will be covered, including gender inequality, women’s empowerment, household dynamics, the role of government against these practices that are enforced by government agencies such as the Federal Trade Commission and the Securities and Exchange Commission. For each topic, we will discuss the economic arguments for and against the relations.

Prerequisites: Econ 471 is required and will be enforced. Students who have not completed Econ 471 prior to beginning the course will be dropped. Previous knowledge of R or Python is required.
CRN 78397; Sect. C3; TR 12:30PM-1:50PM; Pending
Professor D. Alonso Fontes

ECON 491: Non-Linear Econometric Models
This class develops analytical tools to employ economic modeling and data to make better strategic decisions. The objective of this course is to foster data-driven critical-thinking skills through econometric analyses and statistical interpretation.

Prerequisites: ECON 203 & 302, MATH 220/221, or Calculus I equivalent.
CRN 77796; Sect. E3; MW 9:30AM-10:50AM; 119 DKH
Professor M. Cunha Medeiros

ECON 490: International Trade
This course is about the causes and consequences of the international trade of final goods, services, and production inputs. Throughout the course, we will cover the main topics related to international trade that are at the center of the public debate using rigorous economic models. We will discuss issues including the benefits and costs of trade, the effects of trade policies, such as tariffs and quotas, the role of international institutions such as the World Trade Organization; also questions such as what products are traded? Who trades them? And at what quantities and prices are they sold?

CRN 58146; Sect. G3; MW 9:30AM-10:50AM; 1000 LH
Grad Student C. Wang

ECON 491: Decision-Making
This course will help students think about how data and economics can be used to inform decision-making in policy, business, and life. We start by covering the four-broad types of data analysis: descriptive analysis, causal inference, cross-sectional prediction, and forecasting. We then learn how economic and decision theory can be used to determine which of these types of data analysis are appropriate for making different types of decisions and what information is needed. We then cover some core techniques in these different types of data analysis. Students will learn about the pitfalls and challenges they will encounter when applying these techniques to actual decisions by tackling real world examples in business, policy, and in their own lives. Prerequisites: Required Econ 203, 302 and Math 220/221; Recommended Econ 471 or equivalent statistics course.

CRN 78395; Sect. B3; TR 11:00AM-12:20PM; 119 DKH
Professor A. Bartik

ECON 491: Analysis: Business Consulting
Students in this course will work in groups of 4 to organize and analyze a data set, develop models, solve problems, and present results. Classes will alternate discussions about each step of the process with computer lab work. This class focuses on the process rather than the results, of data analysis and problem solving. Participation and presentations will be part of the graded work. Prerequisites: Econ 471 is required and will be enforced. Students who have not completed Econ 471 prior to beginning the course will be dropped. Previous knowledge of R or Python is required.

CRN 78397; Sect. C3; TR 12:30PM-1:50PM; Pending
Professor D. Alonso Fontes

ECON 491: Predictive Analysis
This course develops analytical tools to employ economic modeling and data to make better strategic decisions. The objective of this course is to foster data-driven critical-thinking skills through econometric analyses and statistical interpretation.

CRN 77798; Sect. D3; MW 11:00AM-12:20PM; 119 DKH
Professor R. Armendariz Buaun

ECON 490: Applied Machine Learning
Students will gain exposure to a variety of machine-learning approaches for supervised and unsupervised learning. Topics include regularized approaches like lasso and ridge regression, trees, boosting, support vector machines, cluster analysis, and predictive assessment using cross-validation. Emphasis is given on applications with the use of a programming language like R or Python. Prerequisites: ECON 203 & 302, MATH 220/221, or Calculus I equivalent.

CRN 77796; Sect. E3; MW 9:30PM-10:50AM; 119 DKH
Grad Student C. Wang
